CONSTRUCTION & DEMOLITION DIVERSION PROGRAM

BIN RENTAL FORM

Refuse dumpsters and roll off boxes must be rented from Valley Vista Services. Valley Vista is the only company permitted to rent bins in the City of El Monte for construction and/or demolition projects. For commercial projects, property owners and contractors may not self-haul refuse to disposal sites.

Select residential projects, homeowners and contractors may self-haul construction and/or demolition waste within the following guidelines:

- Self-haul option 1 – Homeowners performing remodel, cleanup, roof, or swimming pool projects on their existing residence may self-haul the resulting waste if desired. The waste must be hauled by the homeowner in a vehicle of one ton capacity or less, so long as the vehicle is not owned by the hired contractor. The waste must be delivered to Grand Central Recycling & Transfer Station (999 Hatcher Avenue, Industry, CA 91748; 626-855-5538). A disposal fee of $67.81 per ton will be charged by the facility.

- Self-haul option 2 – Contractors performing a residential roof project, or a residential swimming pool construction, may self-haul the resulting waste if desired. The waste must be hauled in vehicles owned by the primary contractor, and not the vehicles of a subcontractor. The waste must be delivered to Grand Central Recycling & Transfer Station (999 Hatcher Avenue, Industry, CA 91748; 626-855-5538). A disposal fee of $67.81 per ton will be charged by the facility.

Please complete the information below, and submit this form to the City of El Monte Building Division. A representative from Valley Vista will contact you to make arrangements for your disposal needs. The City will not issue a building permit until all disposal arrangements are finalized, and payment is issued to Valley Vista Services.
